Professional Summary

Full-Stack Developer skilled in building scalable MERN stack (React.js, Node.js, Express.js, and MongoDB) web applications with RESTful API design and AI-powered integrations using the Google Gemini API. Strong foundation in Data Structures & Algorithms using Java, with a focus on writing clean, efficient, and production-ready software.

Education

Chaudhary Charan Singh University (Scriet)

Meerut, Uttar Pradesh

Bachelor of Technology (Information Technology), CGPA: 8.08/10.0

2023 – 2027

Relevant Coursework: Data Structures & Algorithms, DBMS, Computer Networks, Operating Systems, OOP Design

Experience

Frontend Developer Intern | Unified Mentor Private Limited

Aug 2025 – Nov 2025

Gurugram, Haryana (Remote)

- Built responsive, cross-browser web pages using HTML5, CSS3, and JavaScript (ES6+) for consistent UI across devices.
- Integrated Firebase for backend services, including data storage and user authentication in live web applications.
- Enhanced UI responsiveness by resolving cross-device rendering issues through iterative debugging on real-world projects.
- Collaborated using Git and GitHub for version control, branching, and code reviews in a team-based workflow.

Projects

StayGrid

May 2026 – July 2026

- Built a full-stack property rental platform using the MERN stack with AI-powered natural language search and automatic listing description generation via the **Google Gemini API**.
- Implemented category-based filtering across 11 property types, location and price-based search, and an **AI-assisted description update** feature for hosts.
- Integrated **Cloudinary** for image uploads, **Mapbox** for interactive location visualization, and the Google Gemini API for AI-powered search functionality.
- **Technologies:** Node.js, Express.js, MongoDB, EJS, Passport.js, Cloudinary, Mapbox, Google Gemini API.

Smart Mentor

Aug 2025 – Oct 2025

- Developed a full-stack appointment booking platform enabling secure student-teacher interactions through role-based authentication and **real-time data synchronization**.
- Designed **appointment scheduling workflows** with teacher availability management, booking approval/rejection, mood tracking, profile management, and role-specific dashboards.
- Leveraged Firebase Authentication, Firestore Database, and Firebase Hosting to implement secure user authentication, scalable cloud storage, and real-time application deployment.
- **Tech Stack:** HTML, CSS, JavaScript, Firebase Authentication, Firestore Database, Firebase Hosting.

Skills

Languages: Java, JavaScript

Frontend: React.js, Tailwind CSS, Bootstrap, HTML5, CSS3, EJS

Backend: Node.js, Express.js, REST APIs, Passport.js

Databases: MongoDB, Firebase Firestore

Tools: Git, GitHub, VS Code, Postman, Vite, MongoDB Atlas, Render, Vercel

Cloud & APIs: Cloudinary, Mapbox API, Google Gemini API, Resend Email API

Achievements

- Solved 100+ Data Structures & Algorithms problems across LeetCode and GeeksforGeeks, strengthening problem-solving and algorithmic skills.
- Successfully completed a Frontend Developer Internship at Unified Mentor Private Limited, contributing to responsive web application development.
- Developed and deployed two full-stack web applications using the MERN stack and Firebase with AI-powered features and secure authentication.
- Contributed to open-source projects on GitHub through successfully merged pull requests.
